**Subject:** Re: IXL Testimonial

Hello Steve: Here is my testimonial!!!!!! Thanks for your help.

My stepdaughter has a 1995 Dodge Stratus which was purchased used, with about 95,000 miles. As soon as we could we had the oil changed and I put in the recommended 2 oz. per quart of IXL, about 10 oz. About 6 months later the engine had ruptured a fitting in the rear as she was driving home at night, and literally pumped out all of the oil in about 30 seconds. She continued to drive approximately 2 miles with the check oil light on and smoke coming out of the car, until she could pull over safely. I went to see what the matter was and added oil along with 1/2 quart of IXL, started the engine and it pumped it out again. We left the car there, had it towed to my mechanic the next day, and told him what happened. He stated that he was sure that the engine would be ruined and don't expect miracles. I told him to repair the leak if he could and see what would happen before spending \$1500.00 plus on a replacement. We even thought about junking the car since it was purchased for \$1750.00. After repairing the leak he started the engine and called me immediately, " I'll be damned, it is running perfectly and there is no damage to the engine!". I then told him about IXL and gave him some for his own vehicles. The repairs cost us maybe \$200.00 and we still have the vehicle running strong 1 year later. Thanks again for a wonderful product, it has paid for itself many times over. Sincerely Ernest K [REDACTED] Asheville NC.
