TO: I-X-L

Two months ago your I-X-L Rep showed me a friction test of your product. The test proved to me the I-X-L product would work.

I added I-X-L to my 91 G.M.C. 4 X 4 pickup. The performance of the pickup has improved greatly,

I get better gas milage. The standard transmission shifts more smoothly.

I have a feeling I-X-L product will greatly improve the life of the pickup.

Since then I have showed the test to the company's truck drivers. They have also added the I-X-L to their trucks. The drivers are very impressed with the performance.

Being maintenance supervisor for Keegan, Inc., a potato packing warehouse, I have added I-X-L to several gear boxes and I am sure the product will perform well in these too.

Thank you for a great product.
