Dear Sir;

I am writing to express my total acceptance of your product IXL. We have used IXL in our fleet of Chev. V-8 350 Cubic inch engines service trucks. Our vehicles have increased mileage by two to four MPG. We daily keep accurate records to prove our point. Our fleet had over one hundred thousand miles on each unit.

We have had two units that have developed serious radiator problems and have over heated to the point of engine failure. If we had not had IXL in the engines, our mechanics assured us, we would have lost our engines.

My personal automobile is an 85 Chev. Celebrity. The automatic transmission was rough and noisy and would not shift properly. After application of IXL it smoothed out and now has a mileage of one hundred and sixty five thousand miles and still going strong. It quieted down in a short length of time and began shifting correctly.

My son has a 1979 LUV Pick-up that needed to be overhauled. IXL has decreased the oil consumption, added another 50 thousand miles to the life of the engine. It now has one hundred and seventy thousand miles and going strong.

My son also races his Suzuki motor cycle and found additional power and reduced the heat in his engine by using IXL.

I want to thank you for IXL and know it has reduced our operating costs and down time. Our over all performance has been enhanced by using IXL and I would recommend it to others.

Sincerely Yours,

Larry G. [Redacted]
