IXL: I have used this product in my personnel vehicles for four years. The first was a 1997 Chevrolet Silverado that had 89000 mile on it before I discovered this product. MPG average in this truck was 14 before IXL and after I jumped to an amazing 18 mpg in town, and 23mpg highway. Needless to say every thing that I own with an engine has this product in it, and yes it even makes a difference in the law mower, which is now 7 years old and has to mow a full acre of grass once, week.

I have recommended this product to all of my friends and family.
