Good Moring Steve:

I am a owner of a 1993 Chevrolet Corsica with just under 100,000 miles. I have been a user of IXL for over 11 years. My total maintenance cost (outside of Tires, Breaks, oil changes etc.) over the 16 years has been \$487.73. During one winter in the 90's when the chill factor was down in the low 40's below zero my car was the only one in the block that didn't need help starting. I simple would turn the key and it would start without fail. I change oil & filter every 3000 miles. My brother is a mechanic with GM is amazed how well it runs. I also use IXL in the transmission and my riding lawn tractor.

If you really care about your automobile, lawn tractor, etc and want to save money. Take care of them with regular maintenance along with IXL.

Thank you for this great product.
